## PRIMROSES

### (SUPPLEMENT TO PREVIOUS LIST)

Here are a few varieties that are new and some that were omitted from the '43 list because of stock shortage. We also take this opportunity to call attention to a group of plant material suitable for "dooryard" planting for bloom in early February.

**DANTE** . . . . . *Each \$1.50*

Not new, but still the best "almost black" polyanthus. Centered with a perfect star of rich orange and one of the largest in plant and bloom. Filtered sunlight, as under an apple tree, helps bring out the tones of its velvet beauty.

**FLAMBO** . . . . . *Each 50c*

A fine plant with noticeably good leaf umbel of ruffled florets. Red, of slightly deeper shade than flame.

**GENTLEMEN'S PREFERENCE** . . . . . *Each 50c*

*3 for \$1.00*

A group of red polyanthus that we have propagated from seedlings grown in '39 from the best English seed. Only the most outstanding plants were retained, and all score high on general appearance, stem, bloom cluster, size and color.

**MARIE CROUSSE** . . . . . *Each \$1.00*

Acaulis fl. pl. — very double and described as "light burgundy" in color. We find that with full sun and well fed it approaches the shade known as "American Beauty."

**"INCognITA"—JULIAE HYBRID** . . . . . *Each \$1.00*

This English importation is perhaps an amnesia victim, since her name is not available; but so beautiful a plant, with such a wealth of exquisite true pink blooms that it will get along without a name.

**"THE BLUE OF EVENING"** . . . . . *Each 50c*

New polyanthus with long stem and good bloom cluster of misty blue; rather late bloomer.

**VALENTINE** . . . . . *Each \$1.00*

So called because it always blooms in early February unless actually buried under snow. The large flowers are brightest clear rose, numerous in quantity, and continue through the season.

**VIKING** . . . . . *Each 50c*

We are glad to offer again this handsome polyanthus. It is a well balanced late bloomer, in color rich rose bronze. Large and full and an unusually durable flower.

SPECIAL OFFER OF  
JULIAM HYBRIDS for . . . . . \$1.00

Eight plants, mixed on selection in the blue, purple and crimson shades. These will blend into a rich border in the little garden.

---

*Withdrawn From Sale During 1944:*

APPLE BLOSSOM and ROSE MARIE

Orders for these may be booked for 1945 delivery.

---

SEED . . . . . Per Pkt. \$1.00  
Polyanthus mixed, or auricula mixed.

SEED OF MINIATURE BULBS . . . Per Pkt. 50c  
Erythronium, winter aconite, hyacinthus azureum and amethystinus, etc., are included in this mix.

---

Here are some of the small bulbs which bloom together in early February:

ALPINE CROCUS TOMASSINIANUS — Shades of mauve, blue, purple.

ALPINE CROCUS SUSIANNUS — Orange yellow with bronze reverse.

ERANTHIS HYEMALIS (Winter Aconite) — Shining yellow cup within a "ruff" of glossy green.

SNOWDROPS — Large, small and double, starting in January.

HYACINTHUS AZUREUS — Tiny true hyacinth, light shade of bright clear blue.

Winter flowering Primroses such as GREETINGS, SMILES, WINTER SKY, WANDA, etc. May furnish further color and interest to this winter group, and CHRISTINA'S ROSE (Helleborus) may be added to give weight and lead up to the height of a background planting of DAPHNE MEZERIUM.

Prices are post-paid, cash with order, plus 3% for sales tax from Washington buyers.

If order amounts to less than \$1.00, add 5c per plant.

If further particulars are desired, please write us.
